DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. Regarding claim 1, the prior art of record fails to specify or make obvious a phantom for the quality control of radiotherapy treatment, namely the combination of the following elements:

a core positioned in the casing that comprises various elements of different shapes, dimensions, and densities,

where two of the elements are two truncated pyramids of different densities that are fit inside each other,

where each of the pyramids are not completely symmetrical relative to the longitudinal axis,

balls of non-radio-transparent material placed in the core

two lateral faces made of metal wires that define a geometric figure, that are removable and are positioned to face each other.

Phantoms are well known tools used for calibrating medical imaging equipment, however, none of the prior art phantoms disclose the combination of elements.

The balance of claims are allowed for at least the same reasons stated above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. US Pre Grant Publication 2007/0189453 A1- This reference discloses a phantom box with different density materials
- b. US Pre Grant Publication 2003/0048867- this reference discloses a phantom with rods -- different density materials.
- c. US Patent 4,352,020- this reference discloses various geometric shapes of phantoms.
- d. US Patent 4,646,334- this reference discloses a phantom filled with various elements that mimic human organs (see figure 3).
- e. US Patent 7,127,096- this reference discloses a phantom of wires that are sandwiched by a plastic support then filled with water to mimic blood vessels and tissue.
- f. US Patent 4,613,754- this reference discloses a conventional symmetrical phantom.
- g. US Patent 6,674,834- this reference discloses a symmetrical phantom.
- h. US Patent 4,873,707- this reference discloses several nested elements with different densities.
- i. US Patent 4,985,906- this reference discloses a phantom with replaceable elements.
- j. US Patent 6,231,231B1- this reference discloses a modular phantom.
